8.2 Exposure controls
Personal protective equipment:
General protective and hygienic measures:

 The usual precautionary measures are to be adhered to when handling chemicals.
 Avoid direct contact with the chemical/ the product/ the preparation by organisational measures.

Respiratory protection: Not required.

Protection of hands:

Not required.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye protection: Not required.
