

# SOLVENT FOR UHU ALL PURPOSE ADHESIVE

## THINNER FOR UHU ALL PURPOSE ADHESIVE.

# UHU

### TECHNICAL SPECIFICATIONS

**Appearance:** colourless, clear dilution

**Chemical base:** methyl acetate

**Consistency:** Low viscosity

### PACK SIZES

can: 5kg

### PRODUCT DESCRIPTION

UHU Solvent is used to thin UHU All Purpose Adhesive, UHU hart and UHU twist & glue for an easier application. UHU Solvent is also suitable for cleaning equipment (brushes, spatulas, spray gun nozzles) and separating glued objects.

### FIELD OF APPLICATION

Thinning UHU All Purpose Adhesive, UHU hart and UHU twist & glue. Also suitable for cleaning equipment (brushes, spatulas, spray gun nozzles) and separating glued objects.

### APPLICATION

#### Directions for use:

To make UHU All Purpose Adhesive, UHU hart and UHU twist & glue easier to apply, just add 5 – 10 parts of UHU Solvent to 1000 parts of glue. If you are using a spray gun, use a ratio of around 1:1. Always make sure that the thinner and the glue are well mixed.

**Points of attention:** Be careful with varnished surfaces and solvent-sensitive plastics. Always test on a small sample first.
